

Multi-seat Licensing

Introduction

Digital Frog International's new flexible licensing system allows customers to purchase any number of "seats"; the more you buy, the less you pay per seat.

What is a seat?

A seat is one computer user as determined by the home folder or directory of the current user, whether the home folder is stored on the local hard drive, or on the network. You will need to buy a "seat" for each user account that will run the software.

The license code determines the number of seats and the length of time the program can be used; you do not need a separate license code for each seat.

User Account Special Cases

There are a number of possible scenarios that complicate the Multi Seat licensing model.

If guest users have a temporary home folder that is purged when the session ends, you will need to ensure that the cache-cache file in the DFI user directory is excluded from the clean up.

If each computer has multiple user directories for students, you will need to set up a special home folder for students to access DFI programs as each user directory will count as one seat.

If you encounter any other special cases, email thefrogladies@digitalfrog.com explaining the problem or call us 1-800-621-FROG(3764) in North America or +1-519-766-1097 internationally.

Standalone Computers - Windows

Step 1: If you received a disc:

- **Run** the installer on the number of machines for which you purchased licensing – be sure to note where the program is being installed and where the shortcut will be put.

If you do not have a disc:

- **Download** the program here:
<http://download.digitalfrog.com>

If you are set up for bit torrent downloads, we recommend this method. If you are not set up for bit torrent downloads, or have trouble with the torrent download use the Direct Download.

- **Copy** the downloaded installer to the number of computers for which you purchased licensing.
- **Run** the installer on each machine – be sure to note where the program is being installed and where the shortcut will be put.

Step 2: Set up the program on each machine. You will need:

- an internet connection,
- the user id associated with the license (usually an email address) and the license code.
- to download QuickTime from the Apple website if it is not already installed.

Note 1: The user id and license will not be requested again, but will be used by Digital Frog to monitor the number of licensed users.

Note 2: The Teacher Guide is password-protected as it contains suggested answers; the password is shown on your invoice. If you want to customize the workbook materials to more closely fit your curriculum, email thefrogladies@digitalfrog.com. Program text files are also available upon request

Note 3: If you need to set up the program(s) without an internet connection, contact thefrogladies@digitalfrog.com for instructions.

Standalone Computers – MACs

Step 1: If you received a disc:

- **Copy** the relevant program folder to the number of computers for which you purchased licensing.

If you do not have a disc:

- **Download** the program here:
<http://download.digitalfrog.com>

If you are set up for bit torrent downloads, we recommend this method.

If you are not set up for bit torrent downloads, or have trouble with the torrent download use the Direct Download.

- **Double click** on the .dmg file to mount the disk image, and copy the contents of the disk image to an appropriate location on the hard drive.
- **Copy** the program folder to the number of computers for which you purchased licensing.

Step 2: Set up the program on each machine. You will need:

- an internet connection.
- the user id associated with the license (usually an email address) and the license code.

Note 1: The user id and license will not be requested again, but will be used by Digital Frog to monitor the number of licensed users.

Note 2: The Teacher Guide is password-protected as it contains suggested answers; the password is shown on your invoice. If you want to customize the workbook materials to more closely fit your curriculum, email thefrogladies@digitalfrog.com. Program text files are also available upon request

Note 3: If you need to set up the program(s) without an internet connection, contact thefrogladies@digitalfrog.com for instructions.

Networked Computers - Windows

Step 1: If you received a disc:

- **Run** the installer on the Server – be sure to note where the program is being installed and where the shortcut will be put.

If you do not have a disc:

- **Download** the program here:
<http://download.digitalfrog.com>

If you are set up for bit torrent downloads, we recommend this method. If you are not set up for bit torrent downloads, or have trouble with the torrent download use the Direct Download.

- **Run** the installer on the Server – be sure to note where the program is being installed and where the shortcut will be put.
- **Create** a shortcut to the application on the Server on each Client computer

Step 2: Set up the program on each machine. You will need:

- an internet connection.
- the user id associated with the license (usually an email address) and the license code.
- to download QuickTime from the Apple website if it is not already installed.

Note 1: The user id and license will not be requested again, but will be used by Digital Frog to monitor the number of licensed users.

Note 2: The Teacher Guide is password-protected as it contains suggested answers; the password is shown on your invoice. If you want to customize the workbook materials to more closely fit your curriculum, email thefrogladies@digitalfrog.com. Program text files are also available upon request

Note 3: If you need to set up the program(s) without an internet connection, contact thefrogladies@digitalfrog.com for instructions.

Networked Computers - MACs

Step 1: If you received a disc:

- **Copy** the contents of the disc to your Server's hard drive.

If you do not have a disc:

- **Download** the program here:
<http://download.digitalfrog.com>

If you are set up for bit torrent downloads, we recommend this method.

If you are not set up for bit torrent downloads, or have trouble with the torrent download use the Direct Download

- Double click on the .dmg file to mount the disk image, and copy the contents of the disk image to your server's hard drive.

Step 2: **Create an alias** of the application by mounting the network share on each client computer, and copy an alias to the local hard drive.

Step 2: **Set up** the program on each machine. You will need:

- an internet connection.
- the user id associated with the license (usually an email address) and the license code.

Note 1: The user id and license will not be requested again, but will be used by Digital Frog to monitor the number of licensed users.

Note 2: The Teacher Guide is password-protected as it contains suggested answers; the password is shown on your invoice. If you want to customize the workbook materials to more closely fit your curriculum, email thefrogladies@digitalfrog.com. Program text files are also available upon request

Note 3: If you need to set up the program(s) without an internet connection, contact thefrogladies@digitalfrog.com for instructions.
